

Anele Nqabeni

Full Stack Software Developer

✉ anele.nqabeni01@gmail.com 📞 +27 67 876 2327 📍 Western Cape, Cape Town

Professional Profile

Full Stack Developer with over one year of internship experience delivering production ready web and mobile applications across startups and enterprise environments. Experienced in PHP, JavaScript, React, C#, .NET 9, ASP.NET Core, RESTful APIs, MySQL, and SignalR, contributing to scalable software solutions for TEDxDurban, iKhono Africa, Plum Systems, and MetroLink.

Skilled in designing and managing relational databases, developing secure REST APIs, implementing real time functionality, and collaborating within Agile development teams using GitLab. Hands on experience supporting application deployment through DNS configuration, FTP deployments, and cloud platforms including Railway and Vercel.

A dependable, detail oriented developer who thrives in structured, fast paced environments and enjoys building maintainable, user focused software. Seeking an entry level or Junior Software Developer opportunity where I can continue growing across full stack web and mobile development while contributing to a collaborative team.

Education

National Senior Certificate	2019
Silversands Secondary School	
School Prefect in Matric	
Higher Certificate in Information Communication and Technology	2021
Cape Peninsula University of Technology	
Diploma in ICT in Applications Development	2022 - 2024
Cape Peninsula University of Technology	
Advanced Diploma in ICT in Applications Development	2025
Cape Peninsula University of Technology	

Projects

Full Stack Developer	Jan 2026 - Present
MetroLink Startup, Cape Town	
- Built and integrated full stack features across a real time transport intelligence platform serving Cape Town commuters across Metrorail, MyCiTi and Golden Arrow routes. - Implemented real time delay updates using SignalR WebSockets, enabling live transit information delivery to mobile users. - Enforced secure API communication between the mobile client

and backend using Axios interceptors and Bearer token authentication.

- Participated in GitLab CI/CD pipelines and cloud deployment on Railway, contributing to reliable and repeatable release cycles.
- Collaborated in a 2 person Agile team, conducting code reviews and maintaining code quality standards throughout development.

Full Stack Developer

May 2026 – Jul 2026

TESS7 LLC, United States of America | Remote

- Built employer dashboards and candidate facing features for a US based recruitment platform, enabling employers to post vacancies and manage hiring workflows remotely.
- Developed and maintained secure REST API integrations handling job postings, resume management, and user data exchange between frontend and backend.
- Optimised MySQL queries and backend logic, improving data retrieval performance for job listings and candidate records.
- Improved the platform’s UI and responsiveness through targeted frontend refinements, enhancing the overall user experience.

Experience

Web Developer Intern

Jun 2024 – Jul 2025

Plum Systems | API Property | Office Place, Bellville

- Maintained and improved production web applications used by active business clients, ensuring uptime and consistent delivery across live environments.
- Rebuilt and enhanced frontend interfaces using React and JavaScript, improving responsiveness and UI consistency across multiple client facing platforms.
- Developed reusable website components, forms, and content pages in Joomla CMS, reducing manual content work for clients.
- Applied Bootstrap across projects to ensure designs worked cleanly across all screen sizes and devices.
- Resolved bugs and pushed feature updates through GitLab, contributing to faster turnaround on client change requests.
- Supported live production systems through active monitoring, helping maintain platform stability and client satisfaction.

Software Developer Intern

Jan 2026 – Present

TedxDurban | iKhono Africa, Durban | Remote

- Architected and built the iKhono Mobile app from scratch using React Native (Expo), delivering a fully functional artisan to client platform with service discovery, bookings, and profile management.
- Integrated the mobile app with an existing PHP REST API while introducing a dedicated Supabase backend, improving authentication security and database scalability.
- Built the full iKhono web platform collaboratively in an Agile team including dashboards, booking flows, and profile management using PHP, MySQL, JavaScript, HTML and CSS.
- Developed and secured REST API endpoints handling bookings, reviews, and user data with input validation and role based access.
- Managed source control, code reviews, and collaborative development using GitHub for the iKhono Mobile app.

React Native (Expo)

Zustand & Axios

Node.js / Next.js

Cloud Deployment Platforms:
Railway & Vercel

PHP 7.4+

RESTful APIs

DNS Management

FileZilla

NET 9/C#

ASP.NET Core Web API

EF Core

JWT Auth / SignalR / RESTful
APIs

Trello Project Management

JUnit Testing

Software Design Principles &
Practices

Git, Github

GitLab CI/CD

Python Programming

- Maintained and improved the TEDxDurban website, enhancing responsiveness and user experience across devices.
- Managed deployments via FileZilla FTP and handled DNS configuration, keeping the platform live and accessible.
