PROFESSIONAL PROFILE

Full stack developer with hands on experience across production web and mobile development platforms, working with PHP, RESTful APIs and MySQL on iKhono Africa startup, JavaScript and React at Plum Systems, and hands on backend experience in C# and .NET 9, building RESTful APIs and real time features using ASP.NET Core and SignalR on MetroLink startup.

Experienced in designing database structures, building secure endpoints, managing code through GitLab, and supporting deployment processes including DNS configuration, FTP based deployments, and cloud deployment via Railway and Vercel.

A dependable and detail oriented full stack developer who performs well in structured, fast paced environments. Now seeking an entry level or junior software development role to grow across web and mobile platforms within a collaborative team.

KEY SKILLS

- Database Management: MySQLWorkbench, PostgreSQL 18, MySQL
- SpringBoot Framework (MVC, CRUD, Security) Object Oriented Programming with Java
- React, HTML, CSS, PHP, JavaScript & REST APIs
- Python Programming
- JUnit Testing
- Version Control & Collaboration: Git, Github, Gitlab
- Software Design Principles & Practices
- API & Integration: RESTful APIs, JWT Auth, SignalR
- Trello Project Management
- Joomla CMS (Backend & Frontend)
- .NET 9/C# | ASP.NET Core Web API, EF Core, REST API Development
- Skilled in React Native (Expo), Zustand & Axios, Node.js, Supabase
- Cloud Deployment Platforms: Railway & Vercel

EDUCATION

National Senior Certificate

Silversands Secondary School
(2019)
School Prefect in Matric

Higher Certificate in Information Communication and Technology

Cape Peninsula University of Technology
(2021)

Diploma ICT in Applications Development

Cape Peninsula University of Technology
(2022 - 2024)

Advanced Diploma ICT in Applications Development

Cape Peninsula University of Technology
(2025)

Experience

Web Developer Intern | Plum Systems | API Property & OfficePlace | Production Web Apps

HTML5, CSS3, JavaScript | Joomla | React | Bootstrap | GitLab

- Contributed to the development and maintenance of production web applications for business clients.
- Developed and enhanced frontend features using JavaScript and React to improve usability, responsiveness, and UI consistency.
- Built and customised website components, forms, and content pages using Joomla CMS.
- Applied Bootstrap to ensure responsive and user friendly interface designs across devices.
- Resolved bugs and implemented feature updates, pushing code via GitLab for review and integration.
- Assisted in maintaining live production systems, ensuring performance stability and client satisfaction.

JUL 2024

-

JUN 2025

Software Developer Intern | TedxDurban | iKhono Web Apps | Mobile | Full Stack

HTML5, CSS3, JavaScript | PHP 7.4+ | MySQL | REST APIs | DNS Management | FileZilla | React Native | Supabase | Expo Go

Developing a web based & mobile platform that connects artisans and service providers with clients, focusing on service discovery, bookings, and profile management.

Summary and Responsibilities:

- Architected and developed the iKhono Mobile application using React Native (Expo) with a Supabase backend for authentication, database, and cloud services.
- Developed the web platform using PHP, MySQL, JavaScript, HTML, and CSS, building dashboards, bookings, profile management, and service discovery features.
- Built secure REST API integrations and dynamic user interfaces using JavaScript, Node.js, and Supabase.
- Managed source control and collaborative development using GitHub.
- Assisted with DNS configuration, deployments, and website maintenance using FileZilla (FTP).

PRESENT

Full Stack Developer | MetroLink Cape Town | Startup Project | Mobile

.NET 9 | React Native (Expo)| PostgreSQL 18 | SignalR | JWT Auth | Zustand | Axios | GitLab CI/CD | C# | JavaScript

A full stack transport intelligence platform integrating Metrorail and MyCiTi services, built to provide real time delay updates, route performance metrics, and push notifications to commuters via a connected mobile application.

Summary and Responsibilities:

- Built and integrated full stack features across backend and mobile frontend in a collaborative 2 person Agile team.
- Contributed to real time transport updates via SignalR WebSockets and assisted with JWT authentication and role based access control.
- Participated in code reviews, GitLab CI/CD pipelines, and cloud deployment using Railway and PostgreSQL hosting.
- Assisted with API integration between the mobile client and backend, ensuring secure communication using Axios interceptors and Bearer token enforcement.
